

RECRUITMENT

Strategy Consultant Intern in Renewable Energy & Hydrogen Paris Office

Internship description

Hinicio is looking for a final year engineering student, physics, chemistry or similar currently enrolled in a master program, with a strong interest in sustainable energy and hydrogen industries.

The intern will be part of the consultant team based in Paris within one or more projects and will work typically on the following tasks:

- Quantitative and qualitative market research
- Techno-economic modeling of complex (renewable) energy systems
- Benchmarking of competing technical solutions
- Energy policy and regulatory analysis
- Writing of client presentation and reports

What we offer

A 6-months internship in Paris with the purpose to offer a long term contract afterwards if satisfactory. In the long term the person could possibly be based in one of our international offices in Paris, Brussels or Bogota.

An attractive learning opportunity in a highly motivating sector and growing start-up environment.

The opportunity to produce a direct impact on concrete projects, in an international environment.

A worldwidely recognized team of industrial experts to train you
A flexible, human, highly motivating working environment, where "intra-preneurship" is a must.

Profile

Master student with a degree in engineering, chemistry, physics or similar from a leading University / Engineering school.

Strong interest or experience in the energy business

A first experience in the field of sustainable energy, gas, or sustainable mobility in an international environment is a plus

A proactive team player, business sense, creative, open networker, autonomous, self-confident and solution-driven personality

Native speaker in French and fluent in English with solid written and oral communication skills.

Desired skills & expertise

Knowledge or experience in one or several of the following areas: energy systems and infrastructure, renewable energies, hydrogen and fuel cell technologies, alternative fuels for mobility, innovation management, public and private project financing.

Bright analytical skills combined with a hands-on approach to assist clients in designing impacting and sustainable solutions.

Ability to bring projects forward in a challenging international environment.

A keen interest in actively developing and sharing your knowledge.

Excellent communication skills. Ability to articulate complex concepts and collective thinking.

Team spirit, flexibility, a positive and entrepreneurial attitude charisma and ambition.

Other languages (eg. Dutch, Spanish, German, Cantonese or Mandarin) are a plus but not required.

**Deadline for applications:
September 4, 2020 midnight (CET)**

If you are interested in this position, please send your **CV and Cover letter** to paris@hinicio.com with the subject: **Internship Paris Office**

About Hinicio

HINICIO is a strategic consultancy firm specialized in energy transition and sustainable mobility. We are recognized as a leading player at European scale in the Hydrogen industry.

For more than 12 years, HINICIO has been working across the entire value chain helping the industry overcome the challenges and unlock the emergence of hydrogen as an energy carrier.

Our client base includes industrial companies (energy & utilities, automotive manufacturers, tier-one suppliers...), innovative SMEs, investors, or regional, national, and international administrations.

In addition to hydrogen, HINICIO works on a wide range of other critical technologies to the Energy Transition, such as onshore & offshore wind, solar photovoltaic, ocean thermal energy conversion, green transports (hydrogen, battery electric vehicles, natural gas vehicles), energy storage, smart-grids, and energy efficiency.

HINICIO is strongly internationally minded: our headquarters are in Brussels and we have offices in Paris, Bogota, Buenos Aires, Beijing, and direct representatives in the Netherlands, Mexico and Chile.

We have run missions for 14 years in Europe, Latin America, Caribbean, Asia, and North Africa. Our team include both a young team of bright individuals and very senior experts with strong industrial background. We are all very proud to be part of the energy transition and very motivated to take up all the challenges around it.

We favor diversity among our teams, which are composed of engineers, economists, energy & environmental policy experts, and count more than 12 different nationalities.
