Contribute to developing and sharing the team's expertise and know-how with the support of your senior colleagues.

What we offer

An attractive role in a highly motivating sector and growing start-up environment.

The opportunity to produce an immediate impact on projects and clients in an international scope.

A flexible workplace that allows you to balance the demands of your personal and professional life. Hinicio strives to have fun while working with purpose, and understands life extends beyond the office. We support and build healthy working conditions based on gender awareness, social inclusion, cultural diversity and a collaborative team spirit.

An exciting and supportive working environment where intrapreneurship opens doors to opportunities.

An excellent chance for personal career development, including team leadership opportunities for a high potential candidates in the short to mid-term.

A remuneration package in line with the candidate's experience and potential.

Desired skills & expertise

Up to 3 years of professional experience in research, consultancy, and project management with a focus on the energy sector. Previous experience with hydrogen is a plus.

A Master's degree in engineering, Physics, Innovation Science, Economics, Business or other (energy) related discipline.

Experience with managing (small) project teams and the execution of market studies and developing business cases and strategic consultancy assignments is considered a plus.

A networker with a commercial mindset bringing proven business development experience.

A strategic thinker and experience in developing analytical frameworks and methodologies.

A desire to contribute to the transformation of the energy system and our clients efforts to achieve the global climate objectives.

A team player with strong motivation to collaborate and build our practice.

The ability to engage with clients, and build and maintain relationships.

A supportive and dependable consultant who shows creativity and resiliency on the job.

Well-developed writing, presentation and communication skills.

An excellent command of English. (Native) Dutch speakers are preferred, but this is not a strict requirement. French, Spanish and/or German language capabilities are considered a plus.

Applications for this vacancy are accepted on an ongoing basis

If you are interested in this position, please send your CV and Cover letter to recruitment@hinicio.com with the subject: **Analyst - Netherlands**

About Hinicio

HINICIO is a strategy consultancy firm specialized in energy transition and sustainable mobility. We are recognized as a leading player in the hydrogen field in Europe and the Americas.

For more than 15 years, HINICIO has been working across the entire value chain helping the industry overcome the challenges and unlock the emergence of hydrogen as an energy carrier.

Our client base includes industrial companies (energy & utilities, automotive manufacturers, tier-one suppliers...), innovative SMEs, investors, or regional, national, and international organizations.

In addition to hydrogen, HINICIO supports its clients on a broad range of energy transition and zero emission mobility technologies.

HINICIO is strongly internationally-minded: our headquarters are in Brussels and we also are present in Paris, Rotterdam, Bogota, Santiago, Mexico, Beijing and Washington D.C.

We have run missions for 15 years in Europe, Latin America and the Caribbean, Asia, North America and North Africa. Our team include both a young team of bright individuals and senior experts with a strong industrial background. We are all very proud to be part of the energy transition and very motivated to take up all the challenges around it.

We favor diversity and gender equity among our teams, which are composed of engineers, economists, energy & environmental policy experts, and count more than 12 different nationalities.
