

RECRUITMENT

Consultant | Belgium (Brussels)

Job description

Hinicio is looking for a consultant with a background in engineering, business, policy studies or similar with a strong interest or working experience in sustainable energy and hydrogen industries.

The consultant will be part of a team based in Brussels working on multiple projects and leading workstreams within those projects on the following tasks:

Project management:

Ensuring assignments ('projects') are delivered on-time – within scope and on-budget and according to client expectations.

Project execution:

- Quantitative and qualitative market research
- Advisory and project development assistance for high impact projects
- Public funding analysis and developing funding applications
- Techno-economic modeling of (renewable) energy systems
- Benchmark of competing technical solutions
- Market research; Policy and regulatory analysis
- Preparation of client meetings, reporting and delivering presentations

What we offer

An attractive role in a highly motivating sector and growing start-up environment.

The opportunity to produce an immediate impact on projects and clients in an international environment.

A flexible workplace; allowing you to balance the demands of your personal and professional lives. Hinicio strives to have fun while working hard, but understands life extends far beyond the office.

An exciting and supportive working environment, where "intra-preneurship" opens doors to opportunities.

An excellent opportunity for personal career development, including team leadership opportunities for a high potential candidate in short to mid-term.

A remuneration package in line with the candidate's experience and potential.

Desired skills & expertise

At least 3-5 years of experience as a consultant and project manager in the field of sustainable energy and/or transport, with a consulting firm, energy utility, industrial gas companies, public authorities and institutions;

Proven experience in delivering strategic consulting projects and studies in the field of sustainable energy and transport in an international environment;

Business acumen and interest to generate new projects and business opportunities in liaison with other staff;

An open networker who is creative, self-aware, and solutions-oriented with excellent written and oral communication skills;

Multitasker able to manage multiple assignments in parallel under significant time pressure, in an organized manner;

A team player with strong motivation to collaborate and build our practice;

A supportive teammate able to collaborate with client managers and is sensitive to client needs;

A fluent command of English, with a solid writing, presentation and communication skills;

A Master's Degree in Engineering, Business or Policy studies.

Nice to have

Knowledge or experience in one or several of the following areas: energy systems and infrastructure, renewable energy, hydrogen and fuel cell technologies, alternative fuels for mobility, innovation management, public and private project financing.

Ideal candidates are interdisciplinary, combining experience from Engineering, Business and policy related aspects, either by academic background or experience;

Other languages (e.g. Dutch, Spanish, German) are a plus but not required.

**Deadline for applications:
March 31, 2022 midnight (CET)**

If you are interested in this position, please send your **CV and Cover letter** to recruitment@hinicio.com with the subject: **Consultant - Belgium**

About Hinicio

HINICIO is a strategy consultancy firm specialized in energy transition and sustainable mobility. We are recognized as a leading player in the hydrogen field in Europe and Latin America.

For more than 15 years, HINICIO has been working across the entire value chain helping the industry overcome the challenges and unlock the emergence of hydrogen as an energy carrier.

Our client base includes industrial companies (energy & utilities, automotive manufacturers, tier-one suppliers...), innovative SMEs, investors, or regional, national, and international administrations.

In addition to hydrogen, HINICIO supports its clients on a broad range of energy transition and zero emission mobility technologies.

HINICIO is strongly internationally minded: our headquarters are in Brussels and we also have offices in Paris, Rotterdam, Bogota, Santiago, Mexico, Beijing and Washington D.C.

We have run missions for 15 years in Europe, Latin America and the Caribbean, Asia, and North Africa. Our team include both a young team of bright individuals and very senior experts with strong industrial background. We are all very proud to be part of the energy transition and very motivated to take up all the challenges around it.

We favor diversity and gender equity among our teams, which are composed of engineers, economists, energy & environmental policy experts, and count more than 12 different nationalities.
